

## Vink Pig's brush

The VINK Pig's brush with container can best be used in the pen where the pig is active, where it feeds etc. Pigs love using the brushes, it gives them something to do and the brushes keep the skins of the animals clean and healthy.

In hot weather the container can be filled with water, the animals can moisten their skins and in this way they cool off.

If the pig is pestered by skin parasites or flies, the container can be filled with a pesticide. The on/off tap is adjustable.

Prevents boredom and pigs love using the brushes.

The pig's brush can be supplied with or without a container.
