

# SAWDUST SPREADER

## Vink spreaders:

The Vink Spreader is a simple hand tool which will spread your bedding materials in the cubicles very fast and easily, that is powered by a cordless drill. This portable spreader can also spread bedding materials in the cubicles quickly and efficiently when cows are in the stable and there is no need to open and close fences for a wheel spreader.

*Easy, quickly, very fast  
and efficiently. Spread  
100 boxes in 5 minutes.*

Because the material is thrown just above the floor to the side and backwards away from the farmer, there is no dust problem for the operator.

## Vink spreader

- Throws a very uniform pattern, saves product.
- Simple, fast, convenient and economical
- Any most common cordless drill can be used
- Mixes and spreads in one single movement
- Also useful for spreading between the cows
- No dust problems

# LIME SPREADER

## Vink lime spreader

The Vink Lime Spreader is especially designed for hygiene powder, like lime. The lime spreader has a volume from approx. 12 liter and an adjustable output opening. If you walk normal speed approx. 50-250 gram per linear meter will be spread evenly. It is very important not to use moist materials.

Depending on bedding materials and chuck capacity of the drill the spread distance can be adjusted. A full spreader spreading approx 100 gram per cubicle is sufficient for 120 cubicles. The output opening is adaptable for exact dosing.

## Vink Sawdust Spreader

The Vink sawdust spreader is suitable for different types of larger, light bedding materials. The unit spreads and mixes the bedding materials (f.e. sawdust with lime) in one movement.
